SUMMARY

A third-year Information Science Engineering student with a keen interest in web development, data science, and UI/UX design. Demonstrating proficiency in development, data analysis, and user interface design, I have completed numerous projects showcasing my passion for these domains. Eager to expand my practical knowledge through internships, I approach challenges with creativity and a collaborative mindset.

EDUCATION

Bachelor of Information Science , JSS Academy of Technical Education	Expected 2025
---	---------------

XII (CBSE) , Sri Chaitanya College	2021
Percentage - 93	

SKILLS

HTML, CSS, JavaScript, Node.js, Express.js, React, MongoDB, MySQL, Git, GitHub, Tailwind CSS, Bootstrap, PHP, Python, Angular.js, Figma

PROJECTS

SkyStar. A fullstack project that allows users to seamlessly browse, create, and manage property listings. Users can register accounts, add and delete listings, post and edit reviews. Created using HTML, CSS, JavaScript, NodeJS, ExpressJS, MongoDB, Bootstrap.

Weather App. User-friendly Weather App created using React. Seamlessly search for any location, and instantly retrieve detailed weather information.

Multi-Step form. A responsive multi-step form created using React and Tailwind CSS allows the user to move through each step seamlessly.

CO-CURRICULAR ACTIVITIES

- Completed Full Stack Web Development course from Apna College, covering front-end and back-end development technologies.
- Successfully completed UI/UX Design course offered by Google, focusing on creating intuitive and visually appealing user interfaces.
- Participated in a Data Science virtual internship program with Accenture, gaining hands-on experience in data analysis, machine learning, and predictive modeling.
- Completed a Data Analytics virtual internship program with British Airways, acquiring skills in data visualization, statistical analysis, and data-driven decision-making techniques.
- Attended AI workshops and received training in Generative AI techniques, enhancing understanding of advanced AI concepts and applications.
- Completed a web development internship at Octanet, gaining practical experience in building scalable web applications and collaborating within a professional development team.
- Completed a separate web development internship at Codsoft, where I honed my skills in front-end and back-end development while contributing to real-world projects.
- Volunteered with Youth for Seva organization, dedicating time to teaching children from government schools, encouraging educational opportunities and supporting their academic growth and development.
